PERSONAL PROJECTS

Hirezen - A service provider platform | Full Stack WebApp (In Progress)
- **Github Repo Link :-** https://github.com/YashKumar-0307/Hirezen
- This platform provides services like carpenter, plumber, etc. to tier3 cities where there is no other platform service like this available to common people at low price.
- Here, people can register on the portal and add their service and details like the amount they will charge and what services will they provide and how much experienced they are.
- And other people who want the service can contact the service person by registering on the platform.
- This is a team project: My contribution - Frontend Design.
- Tech stack currently used: ReactJS, NodeJS, MongoDB.
- Planning to add Machine Learning based recommendation system that will recommend services based on existing user ratings.

OuRooms - Communications Without any Privacy Issues
- **Project Link :-** https://ouroom.herokuapp.com/
- **Github Repo Link :-** https://github.com/shubham21699/OuRoom
- This chat app will give the safe and sound experience of chatting without any privacy / data issues.
- All the data shared in a room will be temporarily stored on the server and will get deleted automatically as soon as the user logs out of the room.
- Tech stack used: ReactJS, NodeJS, Socket.io
- This is a team project: My contribution - Frontend Design.

Cryptocurrency Tracker
- **Project Link :-** https://cryptocurrency-tracker-c7e2d.web.app/
- **Github Repo Link :-** https://github.com/shubham21699/Cryptocurrency-Tracker
- Get all the data and news regarding all the cryptos currently present in the world.
- Also get all the stats and detailed info of particular crypto here only.
- Currency converter is also available, convert Crypto to USD and also get its exchange value.
- Made with ReactJs and got data from Rapid APIs.

Tesla WebApp Clone | Frontend Landing Page
- **Project Link :-** https://tesla-clone-d5ee2.web.app/
- **Github Repo Link :-** https://github.com/shubham21699/Tesla-WebApp-Clone
- This is the clone of Tesla website made using ReactJS.

Chrome Extension: Tab and Link Saver
- **Github Rep Link:-** https://github.com/shubham21699/chrome-extension-tab-and-link-saver
- It will save all the links input in it.
- It also saves the current active tab on which we are by simply click of one button.
- All the data will be stored in local storage and delete only by double click on delete all button.
